

OLIVIER DAZEL

From France to Sweden

Project: **Supervision of a PhD thesis in acoustics**

Research topic: **Engineering**

Swedish Institution: **KTH**

French Institution: **Université du Maine, Le Mans**

Dates of mobility: **11/06/2018 to 15/06/2018**

Program: **SFVE-A (ex ÖMSE)**

PRESENTATION

[Olivier Dazel](#) is since 2013 Professor at [University Le Mans](#) and head of the [LAUM laboratory](#), a research institute in acoustics. He graduated 2003 with a PhD degree in Acoustics from [INSA Lyon](#) (Institut National des Sciences Appliquées) with a thesis entitled “Modal synthesis for porous materials”.

ACTIVITIES IN SWEDEN

Olivier Dazel visited [KTH](#) (Kungliga Tekniska Höskolan) in Stockholm and the main objective was to support and help [Mathieu Gaborit](#) for his thesis. He had the opportunity to meet there with [Emeline Sadoulet-Reboul](#) and [Peter Göransson](#) with whom he discussed future projects between their laboratories. He discussed also with [Ciaran O’Reilly](#), Researcher at KTH, to discuss common works including a scientific article.

Moreover, Olivier Dazel met with [Clément Brousse](#) and Sandrine Testaz from the [French Institute in Sweden](#) and he presented past collaborations between the [LAUM](#) (Laboratoire d’Acoustique de l’Université du Maine) and [MWL](#) (The Marcus Wallenberg Laboratory for Sound and Vibration Research) laboratories. The idea of formalizing the collaboration between them has also been mentioned.
