

SYLVAIN POGODALLA

From France to Sweden

Project: **Frame semantics**

Research topic: **Informatics**

Swedish Institution: **University of Gothenburg**

French Institution: **INRIA, Nancy**

Dates of mobility: **08/10/2019 to 11/10/2019**

Program: **SFVE-A (ex GALAN)**

PRESENTATION

[Sylvain Pogodalla](#) currently works at the [INRIA](#) (National Institute for Research in Digital Science and Technology) in the research team called [SEMAGRAMME](#) focused on the semantic analysis of natural language in Nancy in France. He graduated with a PhD degree in Computer Science and does research in Artificial Intelligence, Computational Linguistics and Semantics.

ACTIVITIES IN SWEDEN

Sylvain Pogodalla met with several researchers and PhD students from [Gothenburg University](#), including [Ellen Breitholz](#), [Robin Cooper](#) and [Christine Howes](#).

Moreover, he had the opportunity to participate in a workshop on formal approaches to (in)coherence and dynamics in dialogue that was part of a research project on dialogical reasoning in patients with schizophrenia. Numerous discussions took place during which Sylvain Pogodalla could talk about hybrid logical approaches to frame semantics.

Finally, a potential project with his Swedish colleagues on dialogue modelling, with a special focus on discourse disorder and corpus acquisition has been also discussed.
