

**RIAD MOKADEM**

*From France to Sweden*

Project: **Computer Science**

Research topic: **Informatics**

Swedish Institution: **Uppsala University**

French Institution: **Université Toulouse III Paul Sabatier**

Dates of mobility: **21/04/2018 to 26/04/2018**

Program: **SFVE-A (ex TOR)**

## PRESENTATION

[Riad Mokadem](#) is Associate Professor at [Paul Sabatier University](#) (Toulouse III). He graduated 2006 with a PhD degree in Computer Science at [Paris Dauphine University](#). He is also member of the [IRIT](#) (Institut en Recherche Informatique de Toulouse) laboratory (CNRS UMR 5505). His research interests focus on computer science and include, among others, design of dynamic query optimization methods, resource discovery and data replication in large scale data management systems.

## ACTIVITIES IN SWEDEN

Riad Mokadem visited the Department of Information and Technology at [Uppsala University](#). He participated in a research seminar and gave a presentation entitled “Data Replication in Large Scale Data Management Systems (From Grid to Cloud Systems)”.

He met there with several researchers and students, including [Kjell Orsborn](#) and [Khalid Mahmood](#), with whom he discussed potential collaboration and in particular common Franco-Swedish projects.
